

There are many ongoing projects in Canada, spanning a wide range of industries and sectors. Some of the most notable include:

- Infrastructure:
 - GO Expansion – On Corridor (Ontario)
 - Bruce Power Refurbishment (Ontario)
 - Darlington Nuclear Refurbishment (Ontario)
 - Muskrat Falls Project (Newfoundland and Labrador)
 - Eglinton Crosstown LRT (Ontario)
 - Vancouver International Airport Expansion (British Columbia)
- Energy:
 - Énergie Saguenay LNG Complex (Quebec)
 - LNG Canada (British Columbia)
 - Trans Mountain Pipeline Expansion (British Columbia and Alberta)
 - Site C Clean Energy Project (British Columbia)
 - Labrador-Island Link (Newfoundland and Labrador and Quebec)
- Technology:
 - Google Cloud Data Centre (Ontario)
 - Microsoft Data Centre (Alberta)
 - Amazon Data Centre (Ontario)
 - Meta Data Centre (Alberta)
 - IBM Data Centre (Ontario)
- Other:
 - Scarborough Subway Extension (Ontario)
 - George Massey Tunnel Replacement (British Columbia)
 - Abeja District Condominium Complex (British Columbia)

These are just a few examples of the many ongoing projects in Canada. These projects are creating jobs, stimulating the economy, and building a better future for Canadians.

Additionally, there are many other ongoing projects in Canada that are not as large or well-known, but are still important to local communities. For example, there are many projects underway to improve public transportation, build new schools and hospitals, and develop new renewable energy sources.

The Canadian government is also investing in a number of research and development projects, such as the Pan-Canadian Artificial Intelligence Strategy and the Quantum Canada program. These projects are helping Canada to maintain its position as a leader in innovation and technology.

Overall, there are many exciting and important projects underway in Canada. These projects are shaping the country's future and creating a better life for Canadians.
